

## Invitation to ecoConstruct meeting on 2.-4. November 2016 in Denmark

### European network on biobased building materials

Building sector is a traditional sector lacking internationalization. Five European cluster partners have established a long-term strategic agreement : Tretorget (Norway), ByggDialog (Sweden), InnoBYG (Denmark), ecoplus (Austria) and Sustainable Infrastructure Cluster (Poland) have competences that supplement each other. SE is strong in energy efficiency, NO is strong in wood construction, AT is strong in wood construction and cross sector collaboration, PL is strong in affordable energy+ solution and DK is strong in bio-based materials and recycling of building materials. The target companies are innovation driven SMEs who are seeking for international partners, new customers and funding. SMEs will learn best practices from different countries and expand their network that leads to more innovation, job creation and growth.

The first meeting will be in Copenhagen / Taastrup, Denmark on the 2.-4. November 2016

- 2nd of November 2016: Participation in Building Green in Forum, CPH. Participation is free. Seminars and workshops: <http://buildinggreen.eu/>
- 3rd of November 2016: Visit Energy Flex houses and take part in workshop at the Danish Technological Institute in Taastrup on recycling of building materials and biobased building materials
- 4th of November 2016: Chance to visit or arrange a meeting with Danish companies, please state interest area and we will do our outmost to make a match

To learn more about the network: <https://www.b2match.eu/eco-construct>

#### Further topics of international partner events:

Austria: 15.-17. February 2017: Wood construction and Cross sector collaboration workshop for recycling of building materials, matchmaking and study trip event combined with "BauZ! Vienna Congress on Sustainable Building" (15-17 Feb 2017) [www.bauz.at/en/](http://www.bauz.at/en/)

Norway: 8.-9. March 2017: Sustainable urban building where wood is a vital building raw-material workshop, matchmaking and study trip combine with Østerdals konferencen

Poland: *Wroclaw* 13. – 14. April 2017: Affordable energy + building workshop combined with In ENER (International Trade Fair for Renewable Energy Sources and Energy Efficiency) <http://www.inenerg.com/index.php?id=7&L=1>

Sweden: April 2017: Building in wood, low energy construction, energy efficiency and renovation

**Program for the 3rd of November 2016 at  
The Danish Technological Institute, Gregersensvej 1, DK-2630 Taastrup**

- 09.30-10.00 Arrival at the Danish Technological Institute (DTI), coffee will be served
- 10.00-10.30 Introduction to the Danish Technological Institute and participant presentation
- 10.30-11.30 Guided tour to the Energy Flex houses at DTI
- 11.30-12.30 Lunch
- 12.30-14.40 Workshop on recycling and reuse of building materials and development of biobased materials
- 12.30-12.40 Presentation of the building division
  - 12.40-13.10 Circular resource economy and reuse of building materials
  - 13.10-13.40 Indoor climate in relations to building materials
  - 13.40-14.10 Development of new types of biobased building materials
  - 14.10-14.40 Sustainable building materials from hemp, linen and eelgrass
- 14.40-15.15 Coffee break
- 15.15-16.30 Chance to book for individual meetings with participating companies / experts from DTI or general networking
- 16.30- 16.40 Summery and goodbye

*If you which more information please contact Anne Christine Steenkjær Hastrup, [acha@teknologisk.dk](mailto:acha@teknologisk.dk)*
