Miljøstyrelsen

The initiative for the study comes from the Nordic Environmental Protection Agencies, and has been put in effect through the Nordic Council of Ministers waste group - NAG. Aim of the project is to inspire all actors within the sector, and that the selected best practices will be used as the first step in a practical implementation of both waste prevention methods and measures to reduce generation of waste in the construction industry. COWI + CRI was hired to conduct an assessment of initiatives to prevent waste from the building and construction sector. The report comprises experience and practises from the Nordic countries, and the main findings will be presented at the seminar.

Invitation to the first All-Nordic Seminar on waste prevention in the Construction and Building Sector

Venue
COWI

Parallelvej 2
DK 2800 Lyngby
Denmark

Date: 15 June 2011

Last entry Friday 9 June
The seminar is free of charge

COPENHAGEN
RESOURCE INSTITUTE
WASTE · CONSUMPTION · PRODUCTION

NORSAS
Norsk kompetansesenter
for avfall og gjenvinning

COWI

The main goals of the seminar are:

- To take an in-depth look at the ongoing waste prevention measures within the building and construction sector
- To present the evaluated case studies from an economic and environmental perspective.
- To reflect on the role of voluntary initiatives versus the use of political instruments in order to encourage change in behaviour regarding waste prevention.

As a participant you will meet people involved in waste management from e.g. the building and construction sector, local and national authorities as well as research organisations. You will gain insights in the latest processes and practical activities within waste prevention from the industry.

Program

09.00-10.00	Registration and coffee
10.00-10.30	Presentation of the report "Assessment of initiatives to prevent waste from building and construction sectors"
10.30-12.00	Short presentations of case studies and best practices <ul style="list-style-type: none">• Speakers will be announced end May

Directions to COWI office in Lyngby:

COWI's head office is situated approximately 20 km north of Copenhagen Airport and 150 m from Lyngby railway station.

Transport by taxi from Copenhagen Airport:

Approximately 25 minutes, price approximately DKK 450 / EURO 60.

Transport by train:

Copenhagen Airport-Lyngby, approximately 40 minutes, price approximately DKK 50 / EURO 7.

You can either:

- a)** take the train from the airport in the direction of Helsingør and change trains at Hellerup station to the S-train (they are the big, red trains) in the direction of Hillerød or Holte and get off at Lyngby station. or
- b)** take the Metro from the airport to Nørreport Station and take an S-train in the direction of Hillerød or Holte. Get off at Lyngby.

COWI is situated 150 m from Lyngby railway station.

Exit the station via the underground walkway in the opposite direction to the main town, then bear left towards the tall office buildings. Keep left by the railway tracks and follow the path beside the building.

This will lead you to our main reception.
