

# Webinar series: Robotics in the Building Industry

Join us for three interesting webinars! This autumn, SDU is hosting a series of webinars on Robotics in the Building Industry in collaboration with RoboCluster and InnoBYG.

Speakers from academia and industry will provide you with the latest knowledge on robotics and digitalisation for the building industry where there is a big potential for the use of robotics and automation but so far low implementation.

The aim of the three webinars is to give companies and end users from the building industry inspiration and insight into the possibilities of using (collaborative) robotics in the building industry.

Topics are: Collaboration/Interaction, Digital Design/Fabrication and Inspection/Monitoring. Learn more about the programme and the many interesting speakers [here](https://event.sdu.dk/robotics-building-industry).

Date: November 2 - 3, 2020

Location: Online via Zoom

Registration: <https://event.sdu.dk/robotics-building-industry>

## Programme

Webinar 1: Collaboration/Interaction	2 November: 08.45-11.45	Odico A/S, BIOX ApS, KOBOTS ApS, SDU Robotics, SDU Civil and Architectural Engineering
Webinar 2: Digital Design/Fabrication	2 November: 13.00-16.00	COBOD International A/S, BIG, SDU Robotics, SDU Energy Informatics, SDU Civil and Achitectural Engineering
Webinar 3: Inspection/Monitoring	3 November: 08.45-11.45	K-Jacobsen A/S, Capra Robotics ApS, HD Lab, SDU Software Engineering, SDU UAS Centre, SDU Civil and Achitectural Engineering
